

As Safety Experts We Can Save You Money In Insurance Costs

You could be saving significant dollars each year in insurance costs.

Razer safety experts working in collaboration with your insurance team to assist your organization with the necessary information and skills to educate your management team

Not only will we provide you with knowledge on safety industry-specific topics, but we will help you apply this information for cost savings.

Razer Safety has worked with several local and national companies in conjunction with your insurance team. to lower their experience modification rate (EMR). A company's EMR can significantly impact the bottom line. A high EMR causes the company to pay inflated insurance premiums and limits bidding opportunities on projects using contractor pre-qualification programs. Implementing a comprehensive health and safety program, developing an effective training program, and efficiently managing worker's compensation claims are key elements to lowering your EMR.

By using Razer Safety, a company's EMR and insurance premiums will be greatly reduced. Our comprehensive insurance assessments identify specific aspects of a company's claims management that needs improvement. Improvement in deficient areas results in a company that is far more marketable when purchasing insurance.

We understand that a successful project depends on safety, quality, and schedule working together in unison.
